

Discover Newport Beach

Eight miles of beaches with breathtaking seaside cliffs. Luxury shopping and spa treatments. Art walks, live entertainment and cultural venues. The largest recreational harbor on the west coast.... Welcome to Newport Beach.

This oceanfront city encapsulates everything you would want for your group in a seaside town, including a taste of notoriety and a touch of the French Riviera. Treat your group to a stay at the Hyatt Regency Newport Beach, where your guests can enjoy a recent \$15 million renovation – once again elevating an iconic property to the modern level of luxury. Guests will be immersed in the tradition of Hyatt Regency hospitality with the addition of all-new rooms and suites, three new and distinctive pool environments and the addition of SHOR – their new American seafood grill where dining indoor and alfresco are options for both lunch and dinner.

For those interested in an off-property dining experience, we have discovered a favorite among the many restaurants to choose from – Fig & Olive.

Outside the restaurant is a gorgeous landscape of olive trees and gardens. Entering the restaurant is modern and refreshing - a chic feel with a nod to the Mediterranean. Experience shareable communal dining with a focus on the regions of the South of France, Italy and Spain. What is intriguing is the pairing of their extensive variety of extra virgin olive oils. Offered as a tasting at the beginning of each dining experience and, included with each course, a selected olive oil is coupled with the ingredients of the plate, elevating those flavors on your palette for an epicurean experience like no other.

The restaurant features dining room options that can accommodate up to 80 seated guests, making it the perfectly sized venue for your group to enjoy their next gathering.

At the end of the day your guests can choose to enjoy several options, ranging from an exciting nightclub environment to a relaxing sunset cruise in the ocean air.... Newport Beach is a glittering diamond on the ocean, just waiting to be explored.
